St Catharines Order Picker License

St Catharines Order Picker License - Order picking is also referred to as order preparation operation. This is one of the key processes in a warehouse and consists of people called order pickers, collecting and taking articles in a specific quantity prior to shipment so as to accomplish client orders. Order picking is an easy warehousing method. The effectiveness in which this job is accomplished could be directly linked to the productivity of a supply chain. Thus, order picking is one of the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are several certain kinds of order picking. The main types consist of: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker only filling the boxes with things that are from their particular station. The box then moves on to other locations to until the order is done. In this particular technique, there is no movement of the order picker employees. In the wave picking method, the order pickers move around to collect the needed products for some orders. The picker to part method or piece picking is similar where the order picker or pickers move to collect the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking workers. Instead, the products are delivered to her or him via an automated system like a conveyor system or an automatic storage. In the zone picking method, each order picker is assigned to one specific zone. They are responsible for just realizing order picking within this specific area.
