

Toyota Forklift

Toyota Forklift Training St Catharines - In the United States, Toyota Materials Handling inc., or TMHU, continues to be the best selling lift truck provider since 1992. This business has been headquartered out of Irvine, California for well over 40 years, offering a complete line of quality lift trucks. With a distinguished reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota equipment and components built within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to constant improvement, and its environmental systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, links Toyota's success to its robust dedication to fabricating the finest quality lift vehicles at the same time as delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's leading lift truck supplier and is among the magazines impressive world's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other corporations and no other lift truck manufacturer can meet Toyota's history of protecting the environment while simultaneously advancing the economy. Environmental accountability is a key aspect of company decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet another reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more elaborate 2010 emission standards. The end product is a lift vehicle that produces 70 percent less smog forming emissions than the existing Federal standards allow.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and community parks that were damaged by fires and other ecological causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of sellers to non-profit organizations and local consumers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift trucks offer superior strength, visibility, productivity, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps lessen the chance of mishaps and injuries, and increasing productivity levels while minimizing the potential for product and equipment breakage.

System Active Stability senses numerous conditions that might lead to lateral insecurity and possible lateral overturn. When one of those factors are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding durability.

SAS was first launched to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS continues to be integrated into most of Toyota's internal combustion models. It is standard equipment on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory operator instruction, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's rigid values extend far beyond the technology itself. The company believes in offering general Operator Safety Training programs to help customers satisfy and exceed OSHA standard 1910.178. Education services, videos and assorted resources, covering a wide scope of topics-from personal safety, to OSHA policies, to surface and cargo conditions, are available through the vendor network.

Toyota's Commitment to The U.S.A.

Toyota has maintained a permanent presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service parts, with the whole investment exceeding \$113 million dollars.

The new NCC was built to function for TMHU clients and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a instruction center.

Leader in Client Service and Satisfaction

The NCC embodies Toyota's commitment to providing top-notch consumer service. TMHU's 68 sanctioned Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations right through the U.S, supply the most wide-ranging and inclusive consumer service and support in the industry. The company's new and Certified Used lift trucks, service, parts, and financing features make Toyota dealerships a one-stop shop to ensure total customer satisfaction.
